

Senior .Net Core Full Stack Developer

Full Time

Remote or Mt. Laurel, NJ

Summary

Want to work for a company that has actual customers, where your work is noticed and when a sprint rolls out you know that it had an immediate impact? We're building software that is used by thousands of people every day. It helps improve quality of life and can save lives. Compounding pharmacies provide an invaluable service to people and animals from all walks of life around the world. Our team is small, but your contribution to the company's success isn't. We leverage great technology, the cloud, best practices and good ole fashion hard work to feel good about the work we do while helping others feel better too!

Essential Duties and Responsibilities include the following. Other duties may be assigned.

- Participates in SCRUM planning sessions, daily stand-ups, sprint demos and sprint post-mortems
- Exclusive use of DevOps environment for source control, test, and CI/CD
- Maintains currency in their skills throughout the client/server/data layers
- Uses our Wiki or document repository to make notes and share information
- Generates unit tests and uses them
- Mentor junior developers

Required Education and Experience

It is expected that a Senior .Net Core Full Stack Developer has enough experience and exposure to client-side and server-side programming that they are highly skilled. However, to be stack-specific, the best-qualified candidate will have experience in the following:

- 5-10 years of client-side frameworks. Our legacy applications use Aurelia, Backbone, and KnockoutJS. Solid knowledge of Ember or another opinionated client-side framework is acceptable. The bulk of new development is client-side Blazor against .NET Core
- Working knowledge of Azure, Service Fabric, GraphQL, and Blazor Web Assembly
- You should be familiar with npm, yarn, and other library managers.
- Experienced using LESS or SCSS for preparing CSS
- Working knowledge of grunt/gulp task runners
- 5-10 years of C# experience. Java is not an acceptable substitute. You must know the framework. Better if you're up on .NET Core
- 3-5 years of experience with Entity Framework. Code-first/fluent API knowledge preferred but database-first is acceptable to start.
- 3-5 years of experience with SQL. Data stores are reliable collections with Service Fabric so that's a plus if familiar. We do use stored procedures so familiarity with T-SQL is important.
- A BS in engineering or computer science is a plus

Competencies

- Communication Skills
