

Small Animal Information Sheet

GS-441524

Formulations Available at Stokes Pharmacy
Strength: 50mg
Form: Quad Scored Tablet
Flavor: Tuna

Summary
Drug Class: Antiviral
Target Species: Cats

Tablet sizing compared to a U.S. dime

Diagnosis	GS-441524 PO Dosage Rate
Effusion(s) and <u>without</u> ocular or neurological signs	15 mg/kg q 24 hrs or split q 12 hrs
No effusion and without ocular or neurological signs	15 mg/kg q 24 hrs or split q 12 hrs
Ocular signs present (± effusion)	15-20 mg/kg q 24 hrs or split q 12 hrs
Neurological signs present (± effusion)	10 mg/kg q 12 hrs

*The current recommendation is to treat for 84 days minimum

[VIEW REFERENCE CHART](#) for guidance on tablet splitting and adjusting dosages to nearest quarter

Monitoring and Contraindications

It is very important to weigh cats weekly during treatment, using accurate scales - weight gain and/or growth in kittens will occur with successful treatment necessitating an increase in dose to ensure that the dosage of antiviral administered is still appropriate for the type of FIP being treated. If the cat is on prednisolone treatment, this should be stopped while giving GS-441524, unless it is required for short term management of specific immune-mediated disease arising as a result of FIP e.g. haemolytic anemia. Supportive therapies such as antiemetics, appetite stimulants, fluid therapy, and analgesics can be given with GS-441524 as required.

Storage Requirements

Store at 77° F or below.
