

Client Name:

Patient Name:

FIP: Home Care Diary

Home care and monitoring are essential parts of caring for your cat when diagnosed with Feline Infectious Peritonitis (FIP).

This diary is designed to help you effectively monitor your cat's condition between veterinary visits, as well as provide valuable insights to your veterinarian.

Date	Weight	RR*	Appetite	Demeanor/ Energy Level	Notes/Observations
__/__/__	__ lbs __ oz or __ kg		<input type="checkbox"/> Increasing <input type="checkbox"/> Decreasing <input type="checkbox"/> Unchanged		
__/__/__	__ lbs __ oz or __ kg		<input type="checkbox"/> Increasing <input type="checkbox"/> Decreasing <input type="checkbox"/> Unchanged		
__/__/__	__ lbs __ oz or __ kg		<input type="checkbox"/> Increasing <input type="checkbox"/> Decreasing <input type="checkbox"/> Unchanged		
__/__/__	__ lbs __ oz or __ kg		<input type="checkbox"/> Increasing <input type="checkbox"/> Decreasing <input type="checkbox"/> Unchanged		
__/__/__	__ lbs __ oz or __ kg		<input type="checkbox"/> Increasing <input type="checkbox"/> Decreasing <input type="checkbox"/> Unchanged		
__/__/__	__ lbs __ oz or __ kg		<input type="checkbox"/> Increasing <input type="checkbox"/> Decreasing <input type="checkbox"/> Unchanged		
__/__/__	__ lbs __ oz or __ kg		<input type="checkbox"/> Increasing <input type="checkbox"/> Decreasing <input type="checkbox"/> Unchanged		

*Respiration Rate (RR) can be calculated by counting the number of times your cat's chest rises and falls (1 rise and fall equals 1 breath), every 60 seconds. It may not be necessary to weigh your cat daily for the entire treatment course, your veterinarian can advise on this.
